being in nature – preferably close to the mountains or the sea; globetrotting

PERSONAL STATEMENT

BEING ON THE GO. At the moment I am often abroad which I appreciate. It's like diving into a complete different world and I am open to take in all the impressions it brings. The challenge can be big but it helps reinvent myself and my creative work. It is this what makes it especially interesting. **THE CHALLENGE.** This applies not only for my way of life but also for my work. I enjoy taking on new and demanding tasks and I am motivated and willing to allocate a bit more time for a challenge. It doesn't necessarily have to do with the world of design but what matters to me is the aspect of communication. **THE BALANCE.** This is my way of keeping an optimal balance between my life, experience and work. This is important since it means life quality to me which keeps me going. **FREELANCING IN GRAPHIC AND WEBDESIGN** offers me a good opportunity to follow that philosophy.
